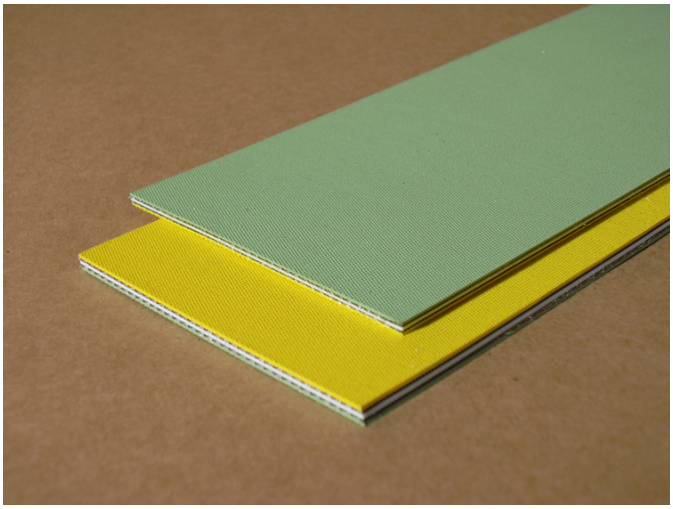
6-1430: FG-14/30F

Color: Green
Plies: 2
Nom. OAG: 0.12" +/- 0.016"
Fabric: Polyamide
Top Surface: Green Rough Texture
Bottom Surface: Yellow Rough Texture
Compound: NBR
Work Tension: 40 lbs./PIW
Elongation: Less than 1%
Weight: 0.055 lbs./PIW

Minimum Pulley: 1.2"
Working Temp: -4 to 212 °F
Attributes: Anti-Static, Abrasion Resistant

Features

6-1430 uses an abrasion-resistant compound on both the top and bottom covers, delivering long wear life and consistent gripping performance. The construction provides durability, stability, and reliable belt tracking under continuous demand.

The adhesive-free splice design ensures smooth running and reduced vibration, making the belt suitable for high-speed operations and precise product handling where clean, uniform performance is critical.


6-1430 is commonly used in folder-gluer systems, paper converting lines, and as a light-duty live roller drive belt in facilities requiring repeatable motion, reduced maintenance, and dependable traction.
